Rats were maintained on an ethanol-sucrose diet for two months. Their intakes of ethanol, sucrose, water and body-weights were measured. After a marked loss of body-weights during this period, the body-weight of animals on the ethanol and sucrose diets was significantly increased after an eight-week interval.

---

Animals were then switched to two other diets that had no sugars and alcohol, and maintained for a further eight weeks; their subsequent weights were compared to those on the other two diets. Both sexes gained significantly more body-weight than on the first diet they had been fed, but only the sucrose diet was associated with significant increases in the ratio of red to white blood cells.

We have tried and tested all the codecs that we could get our hands on and have added the latest additions to the pack that we have found to date. It is a very simple to use installer as well as there is an auto updater built in. The updates are only for the most up to date codecs and addons. License: The license is a standard General Public License (GPL). License terms for sources can be found on the project page. Night\_Raven Codec Pack is a collection of codecs that enables you to play multimedia files from a wide variety of formats on your computer. Codecs are components that are used for encoding or decoding signals or digital data streams in order to make them accessible to other applications. The actions performed by such a utility translate into decoding whenever the file needs to be edited or played and encoding the signal or data stream for encryption, storage or transmission. This collection of codecs ensures support for the following formats: AVI, MPG, MPEG, VOB, EVO, MP4, MOV, 3GP, WebM, OGG, OGM, OGV, FLV, TS, MTS, M2TS, MKA, MKV, BDMV, MPLS, RM, RMVB, BIK, MP3, DTS, DTS-HD, AC-3, AAC and FLAC. During the installation, users can choose to disable support for certain file types according to their preference. Night\_Raven Codec Pack's setup menu makes it possible to modify speaker configuration by choosing between Stereo (2.0) and Multichannel (5.1) outputs. Media Foundation can be disabled for some of the video formats, in case there are issues with displaying subtitles. All the formats listed above can be associated with Windows Media Player since codecs packs usually need a host application that they can be implemented into.
