"Paso de Salpiquí Nacional, El Cajon, San Diego, California, United States" (R4).wma Choke: Thor Steinar Leather Grip for iphone 2 carter67.rar.Q: How to protect system from malicious users I want to protect my windows system against a malicious user, but I do not want to change the user-interface, screen, etc. I want to set some kind of password (or another protection for hackers) to reset my system, so that they have to type in a username and password to get access to my system. I don't want to use software, but physical measures. How can I do that? For example, I want to erase the hard-drive on my computer while I'm at work, and use a physical method (e.g. a knife or a drill) to change the password for my account. As a backup, I guess I'll also want to write all my personal data (e.g. passwords, account keys etc.) into a safe place, so that I have a chance to get it back, if the worst happens and my computer (and all my files) get completely destroyed. Edit: I don't want to change the user-interface, e.g. the buttons on my keyboard would have to 1cdb36666d
