Tinderbox Visual Novels are text-based adventures that evolve with each play. The current direction of development will always stay as close to our original vision as possible. Game "Tiger Fighter 1931 Sunset MP047" is not currently supported on Google Play. When it comes to games, Tiger Fighter has always been on the cutting edge of technology. Whilst the games have evolved to become more complex, there is no place for dulling of the graphics, and no place for lack of ambition in gameplay. This is not a game for the weak of heart or those who require easier gaming. At the end of the day, it is a game where you will face defeat many times. The only things that can be done, to guarantee a win, are to figure out the correct route, or to use the correct type of counter attack. The scale of this game is world-wide. If the player can successfully take out one target, then they will soon be able to take out the next. Play as Edmond Dantes, a World War I submarine captain who is passed over for a promotion and is given the job of transporting the Prince and his family to America in order to ensure Britain's new ally. Edmond is assigned to escort the young Duke and his mother to America, where they are to marry. When the Duke and his family arrive in America, they are greeted by a crime boss who demands his cut of the deal, and that they all work for him. Wondering who this boss is and why the Duke has been taken hostage, Edmond attempts to find out. Will the player be able to find the boss and resolve this problem? With trophies, leaderboards and a vast and evolving multiplayer Mode, there is always something more to do when you play.
