Photoshop vs Photoshop Elements: which one should you use? If you're a beginner or an advanced Photoshop user, the question

is whether to buy Photoshop or Photoshop Elements. While Photoshop usually comes with a pricier price tag, it has more features and has better support and online resources available. Elements, on the other hand, is a cheaper, feature-light version of the Photoshop editing suite. On the downside, it doesn't have as many editing functions as Photoshop, so you won't be able to do everything Photoshop can. For example, if you are working with larger images, or you are working with lots of layers, Elements might not be the right choice. Additionally, Photoshop Elements has fewer video editing tools, design tools, and web page design tools than Photoshop. For the most part, however, Photoshop Elements is a great option for basic photo editing, but there are advanced users that need the full functionality of Photoshop for professional design and editing. Also, even though Photoshop Elements has a simpler user interface, it's much easier to use than Photoshop's, so if you're looking for a beginner-friendly program, Elements is for you. However, as a Pro user, you'll be ready to take advantage of Photoshop's features pretty quickly. How to choose the right version of Photoshop or Photoshop Elements? If you're a beginner, or if you're looking to purchase the cheapest version of Photoshop or Photoshop Elements, you should consider the following versions: Adobe Photoshop CC Adobe Photoshop CC 2017 (64 bit version) Adobe Photoshop CC 2017 (32 bit version) Adobe Photoshop Creative Cloud Adobe Photoshop Creative Cloud 2017 Adobe Photoshop Elements 12 Adobe Photoshop Elements 12 2017 Adobe Photoshop Elements 12 2017 for PC Adobe Photoshop Elements 12.2 Adobe Photoshop Elements 12.2 for PC Adobe Photoshop Elements 14 Adobe Photoshop Elements 14 for PC Adobe Photoshop Elements 14.1 Adobe Photoshop Elements 14.1 for PC Adobe Photoshop Elements CC 2018 Adobe Photoshop Elements CC 2018 (64 bit version) Adobe Photoshop Elements CC 2018 (32 bit version) Adobe Photoshop Lightroom CC Adobe Photoshop Lightroom CC 2017 Adobe Light

The issue is that I don't know how to populate the listview. This code is after the xml layout has been compiled: List locationList = new List(); locationList.Add(new Location("Location 1")); locationList.Add(new Location("Location 2")); locationList.Add(new Location("Location 3")); ListView locationListView = FindViewById(Resource.Id.locationListView);
